

Tulip Cycling

How would you like to take a vacation where you cycle along smooth, dedicated bike paths that run along thousands of kilometers of picturesque canals, fields, towns, and parks? You stop when you like, enjoying the green everywhere, talking with locals (most of whom speak English), and savoring delicious foods in cafes and restaurants in every town.

Tired? Stop when you like and bed down in an intimate hotel in any town, getting to know the rich history as you dine in a room overlooking the main street.

Lost? Use the complimentary mobile phone to check in.

Have kids? If so, they can enjoy riding their own bikes, a tandem bike, or in a trailer bike. Holland is "kid-friendly" - you can stop your bikes at any local park to let the little ones have an unstructured break from cycling...

Sounds good? Well it is even better than it sounds: You can arrange the whole adventure over the Internet from the comfort of your home or office anywhere in the world!

Tulip Cycling is an innovative early user of the Internet to market its services to visitors planning a vacation in Holland. Their web site reflects a professional approach to touring by cycle and provides potential customers with the sense that this is an organization on the Internet they can be comfortable dealing with.

About Tulip Cycling

Tulip Cycling is a cycling and touring company located in Houten, Holland (The Netherlands). Houten is a town about 30 minutes drive from the country's Schipol International Airport, which is outside the capitol city of Holland, Amsterdam. Houten is near the large regional city of Utrecht. This makes the small town and Tulip cycling easily accessible by highway, train, bike, and even by water. The company was formed in the mid-1990's by Adrian Blok, a cycling enthusiast. The business was first started on a very small part-time basis and has grown to be a full-time venture. Tulip Cycling rents out a

complete set of cycling gear and provides detailed itineraries for their customers. They even provide accommodation bookings. You can choose to take their full set of offerings, or pick and choose what services you need and want.

Tulip Cycling has worked hard to ensure that they are the quality leader in the field. All the equipment rented is top quality cycling gear. It is maintained properly and renters get fully equipped bicycles. Each bike comes with an assortment of safety and security features, as well as options like a trip odometer, map holder on the handlebars, and more.

More details on Tulip Cycling are available on the company web site:

Interview with Adrian Blok

The author of this case study had the opportunity to use Tulip Cycling's services for a family cycling tour of the Netherlands. At the beginning of the tour, he interviewed the founder and owner of Tulip Cycling, Adrian Blok, to get some insights into how the Internet is helping Adrian's company.

Question: When did you put Tulip Cycling onto the Internet?

Adrian Blok: The web site was developed and put up on the Internet in the year 2000. The choice of the Internet as a marketing medium was due to the high costs of setting up a sales organization in the USA. To sell our services to travel agents there we would have to pay high commission costs as well as high costs for trade shows and our traveling expenses. Finally, we wanted to keep the operation close to home for better control.

Question: Is the Internet a cheap way to advertise?

Get the rest of this case with your license purchase!

Licensed cases are in **Microsoft Word** format so you can easily edit them if you wish.

You also get the teaching note with solution suggestions in the package!

Instructor licenses are for **your individual lifetime use** of the case.

(Institution licenses are also available)

Great cases that are classroom proven for great learning!
